SPECIFICATION OF

"Standard"
PLUMBING FIXTURES

For LAKE VISTA HOMES

Submitted by JOS. LEBER

Date JANUARY 8, 1940

SF-4

RECOGNIZED MARKS OF QUALITY

Your Protection Is In The Name, "Standard"

IN WHITE OR COLOR

The Trade Mark "Standard" is the universally recognized mark of quality in plumbing fixtures. For your protection "Standard" Plumbing fixtures, in white or color, have the following marks of identification.

This trade-mark is printed permanently in the ware of Vitreous China plumbing fixtures, printed permanently in the ware of plumbing fixtures made of regular enamel, and cast or stamped in the metal of brass fittings.

This trade-mark, printed permanently in the ware, identifies plumbing fixtures made of "Standard" Acid-Resisting Enamel.

This word on "Standard" Brass Goods indicates renewable seats and threads, a "Standard" feature.

"Church" Seats, which are regular equipment on "Standard" water-closets, are identified by this trade-mark, which is pressed into the under side of the seat.

And look for the green label affixed to all Regular Enamelware and red label affixed to all Acid-Resisting Enamelware, which also identifies them as "Standard" and which gives you an added safeguard, with its warning to all who handle or work around the fixture at the time of installation to "be careful". This further assures you of having a satisfactory fixture in all its original, sparkling beauty. "Standard" Vitreous China Fixtures also carry a green label.

SPECIFICATION OF "Standard" PLUMBING FIXTURES SELECTED FOR
